

ElectroShop ERP — Sequence Diagrams

4 key system interaction flows.

Flow 1: Checkout & Payment

Customer selects products → cart → checkout → order placed → payment processed → inventory reserved.

Flow 2: Employee Confirms Payment

Employee opens pending orders → clicks confirm → types customer name IN CAPS → payment confirmed → stock deducted.

Flow 3: Customer-Owner Conversation

Customer opens inbox → creates conversation → sends message (grey tick) → owner polls every 15s → reads and replies → sender tick turns blue (read receipt).

Flow 4: Superadmin Creates Owner

Superadmin fills form → creates owner with UPPERCASE password → owner logs in → forced password change.
